What are the differences in accessing *Lumina* from the B-C Canvas site and a school learning management system?

The *Lumina* exercises function the same, the difference is the set-up.

B-C Canvas Site
Using best practices Bolchazy-Carducci Publishers designed the *Lumina* content as a universal style syllabus, by chapter/book. Providing a chapter/book overview layout with exercises listed in the order they are presented in the textbook.

While a universal style syllabus is the best practice to provide online graded content to multiple users/schools, there are limitations with the universal style setup.

- Teachers can not add content to the B-C Canvas course
- Teachers need to use an external method to assign the *Lumina* exercises
- Teachers need to export student grades from B-C Canvas and enter grades into their gradebooks

Accessing *Lumina* content from the B-C Canvas site does require the school to provide student names and email addresses. No student information is saved. Privacy statements and security document are available for schools to review.

School Learning Management System – LTI links
Using Bolchazy-Carducci Publishers *Lumina* content LTI links teachers place the LTI links in their school learning management system course.

Using an LTI Link compatible learning management system allows the teacher to build their course based on their own syllabus. Bolchazy-Carducci does provide an overview document of the *Lumina* content as a guide for setting up your learning management system course.

- Teachers add *Lumina* content to their course based on the order and pace they teach the course
- Teachers use their course learning management system to assign the *Lumina* content exercises
- Student grades are automatically recorded in the course gradebook
